Sanitary ware

dine

Knud Holscher

## **Enduring design, enduring strength**

Our sanitary ware range by Knud Holscher combines cleanness in its lines with cleanliness in its function, and unlike our hardware collection of individual yet complimentary items, this series consists of fittings that form a cohesive whole.

Danish architect and industrial designer Knud Holscher has been part of d line from the beginning, conceiving our first coordinated line of architectural products in 1971 as 'modest design that is designed to last'. Since then, we have continued to hand craft enduring products formed in our signature raw material, AISI 316 rust-resistant, non-corrosive, marine quality steel, that stands up to the high humidity levels of the bathroom.

Dispensers and bins, bathroom accessories and a panel system of 21 pieces that can be configured up to 300 different ways make up the range, which sits as comfortably in the interior design of private homes as in high-functioning, high-traffic public buildings.

- 20-year guarantee.
- Designed never to date.
- Easy to install and to refill.
- Part of a cohesive collection of parts that work seamlessly together.
- Available as a BIM file on our website or on the NBS National BIM Library, so that specifying it straight from the drawing is effortless.

To see our complete sanitary ware range please visit [dline.com](http://dline.com).

## **Our commitment**

We place enormous value on our products' reputation for standing the test of time, because we believe that anything that's less than superb in its design and craftsmanship is simply a waste – not just of money but also of resources.

Today that commitment to sustainability exists as a 20-year guarantee on our products (with the exception of electronic parts). This commitment extends to responsible sourcing of our steel, to low-emission hand assembly and to a lean factory that never produces more than what is needed.

Between 50 and 70 percent of the steel in d line products is recycled. Our waste account for about 0.3 per cent of our entire production – and we're working to reduce even this small number all the time. When we have used the steel for the purpose we bought it for, we ensure nothing is thrown away. Our scraps are carefully sorted and recycled, as a way to repurpose, reuse and avoid unnecessary waste.

# Colours and finishes

Having seen a need for our enduring designs to come in a wider range of aesthetic options, we've developed a line of different colours and finishes for our architectural sanitary ware range.

Satin stainless steel

Polished stainless steel

PVD charcoal

PVD gunmetal

PVD copper

PVD brass

RAL 9005 Black

RAL 7037 Dusty grey

RAL 7047 Telegrey

RAL 9016 White

**PVD finishes**

Physical vapour deposition (PVD) creates an extremely high-quality, high-durability finish when applied to stainless steel. With it we can now create our sanitary ware in a brushed satin or a polished finish, in Gunmetal, Copper, Charcoal and Brass. And thanks to PVD's strong hygiene profile, cohesive bathroom designs can now be achieved with solid brass levers and PVD brass sanitary ware. Besides our 20-year product guarantee, we offer a 5-year guarantee on the PVD finish.

**Powder coating**

Four sophisticated solid RAL colours join our offer, created to pair with our minimal designs. The applied finish of these colours is silk matt gloss 20, which results in pure, undiluted pigment beneath a hard, colourless surface that's low-sheen, perfectly smooth and easy to clean by wiping with a damp cloth. Besides our 20-year product guarantee, we offer a 5-year guarantee on the powder coated finish.

# Bathroom accessories

Like so many of our pieces, the bathroom accessories are characterised both by straight angles and round detailing. Each piece robustly stands up to humidity, cleaning products and years of use.

That sense of timelessness sums up our products and how their design is enduring. Because they're minimal and clean-lined enough to fit anywhere – whether a palace privy or a modern-day personal sanctuary.

# Dispensers and waste bins

Every piece of our modular dispensers and waste bins features curved edges and hole details a nod to the original bend in the L lever handle that d line is renowned for.

But because our design is not about decorative details, the hole of course has a practical purpose: it's an indicator of when supplies of whatever the piece is holding are running low.

Sanitary ware

# Soap dispensers

Our line of sanitary ware by Knud Holscher is a cohesive group of products in AISI 316 stainless steel, to mix, match and assign various jobs to.

The soap dispensers, traditionally used by bathroom sinks, can also be lined up and wall-mounted in the shower for shampoo, conditioner and shower gel, for a clean, bottle-free bathroom aesthetic.

Our new Touchless soap dispensers by Knud Holscher merges technology with heritage. Realised in AISI 316 stainless steel, these are already-loved pieces from our sanitary ware line, that have been given new functionality and an amplified hygiene factor by being fitted with motion-activated technology. The result? A clean look with cleaner functionality.

Sanitary ware

# Barrier-free

d line

d line's move into barrier-free is about enabling people, and as with many of the products we design, our leap into this important new area started with a need.

The range serves both the disabled community and helps the elderly remain in their homes in a way that is discreet and understated. Like our other categories, our barrier-free products fuse aesthetics and functionality.

Extensive user testing has shown a great need for products in this category that look good, so we have created them with features such as user-friendly operation; different colour options for easy detection by the visually impaired; and warmth to their touch to avoid causing pain to arthritis sufferers.

Starting with a lever handle for barrier-free, we have since developed folding seats and both a static and folding grab bar.

# Sanitary panels

d line

For the modular panel system, elements are combined within a single frame. Choose between 21 interchangeable pieces that can be configured up to 300 different ways. Combinations can be placed horizontally side-by-side in their own frame, or vertically according to the wishes of the architect.

Installation of the system, pioneered over years of technical design development, takes a maximum of 20 minutes and its one-point locking mechanism allows for cleaning and refilling every module at the turn of a single key.

Now there are even more variations to the system's design, as each panel is available in our four undiluted silk matt RAL tints: White, Black, Telegrey, Dusty Grey.

Via 57 West  
BIG  
New York, USA  
2016

**About d line**  
d line is a heritage Danish design brand conceiving and hand crafting enduring architectural hardware, sanitary ware and solutions for barrier-free living. Its products are present in many iconic buildings, from MoMA and Via 57 West in New York City, to the SAS Royal Hotel and the Royal Danish Playhouse in Copenhagen.

The brand's ambition is to be universally known, coveted and admired for the uncompromising endurance of its design, craftsmanship and quality.

[dline.com](http://dline.com)

**BIM – d line to download**  
Accessible via our website as .dwg, .ifc and .rfa files ready to insert into drawings created in programmes such as Revit or ARCHICAD, our BIM files provide designers with up-to-date, technically relevant information, all at a click. To start your BIM journey, go to [dline.com](http://dline.com).

Some of our objects have also gone live on the NBS National BIM Library. Visit [nationalbimlibrary.com](http://nationalbimlibrary.com).
