introduction

With a vast array of products incorporating washroom solutions, doorsets, ironmongery, security and automation, Allgood provide the construction industry with a level of service that cannot be beaten.

Introduction

Allgood Plc is one of the worlds leading companies in the supply of solutions for the door, door openings and washroom.

Since our inception in 1948, we have completed tens of thousands of architectural projects covering many countries around the world. We specialise in providing a total solution to meet the requirements of any project from small residential schemes to the worlds largest construction projects.

From design concept to final handover, Allgood can offer an unequalled level of service throughout the duration of your project. With a wide range of products, Allgood Washroom can provide a co-ordinated solution for any washroom project.

Project Experience

Over the years, Allgood Washroom has been privileged to have worked on and successfully supply many prestigious architectural projects. Listed below are a few examples of recent projects that we have completed:

- The Shard
London
- London Clinic
London
- Corinthia Hotel
London
- Heathrow Terminal 2 & 5
London
- Polish Embassy
London
- Leadenhall Building
London
- Glasgow School of Art
Glasgow
- Newcastle Science Central
Newcastle
- Brent Civic Centre
London
- 30 St Mary's Axe
London
- 26 - 31 Charlotte Square
Edinburgh
- Edinburgh Centre for Carbon Innovation
Edinburgh

toilet brush holder

added value

In over 65 years of existence, Allgood has completed tens of thousands of architectural projects. Allgood understand what is required for projects of all scales ensuring that your project is in safe hands.

Manufacturing Specials

Not only does Allgood offer a vast range of washroom, ironmongery and access control products, we also manufacture specially made items to suit our customer's specifications. We are able to modify multiple areas of a product including the size, finish or material.

This is enhanced by our ability to manufacture in house, giving us complete control over the whole process.

Modric

The Modric range of architectural ironmongery is synonymous with three words: quality, durability and aesthetics. The Modric washroom range has been developed by Allgood under these same principles.

The signature of the Modric washroom range is the radius detail which provides the unifying aesthetic element. Marine grade 316 stainless steel is utilised to form the consistent visual appearance whilst providing the highest level of corrosion resistance.

Manufactured in the UK with the attention to detail that only Allgood provide, the Modric range enhances the washroom environment whilst providing faultless performance for years to come.

Contego

Contego is the Antimicrobial Copper range from Allgood that provides the properties of copper with the aesthetic of stainless steel.

The antimicrobial properties of copper are undeniable but a barrier to its use has been that pure copper has an aesthetic that does not always sit well with modern interiors.

By using a registered copper alloy, in accordance with the Copper Development Association, the Contego range has the aesthetic of stainless steel whilst providing the proven antimicrobial properties of copper. It has been proven to kill 99.9% of bacteria within 2 hours.

Bespoke Design

Allgood appreciate that the interior design of an aspirational project needs to make a lasting impression. Utilising our product development team and manufacturing facilities, Allgood can consult with architects, designers and end users to achieve the unique design required for any project.

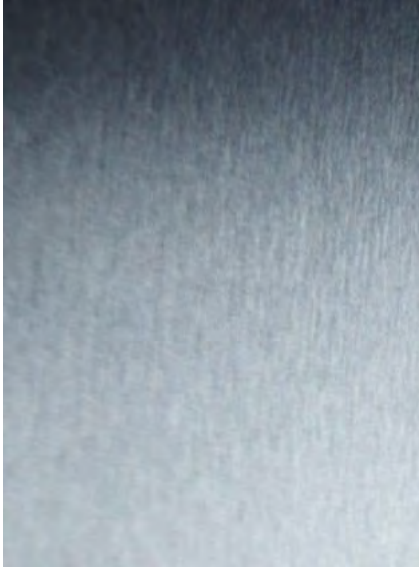

Lessons learnt

To continually improve our customer service, we have learnt from issues and challenges that have arisen on past projects and changed our processes to ensure that Allgood is providing you with the best service possible.

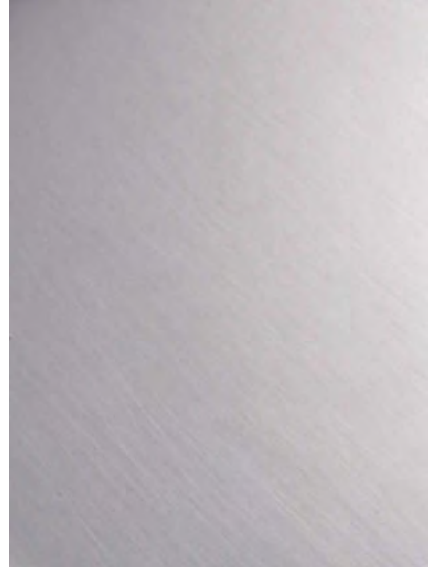

Whether it be special procurement, door-by-door packing, master key scheduling or the art of contract management, Allgood understand what is required of projects of this scale and can be flexible to your needs, ensuring that your project is in safe hands.
